Instructions

These charts are referred to as “Implementable GTO Charts” because they are as close to GTO opening ranges as you can get without splitting the way you play each hand. For example, there are many instances where the GTO strategy suggests playing a specific hand some portion of the time, perhaps 33%. In the Implementable GTO Charts, if there are three hands, such as Q-6o, Q-5o and Q-4o, that each get played 33% of the time, only one is played, making the strategy much easier to implement while only sacrificing a tiny bit of equity.

These charts assume you are playing 100bb deep and that the action is folded to you unless otherwise stated. If there are raisers or limpers in front of you, the situation changes and the charts no longer apply. These charts assume your opponents play a GTO strategy, which will rarely be the case. If your opponents play too tightly or too loosely, you should make significant adjustments to take advantage of their mistakes.

Bet Sizing: The RFI ranges assume a 2.5bb raise from every position except for the small blind. The small blind RFI assumes a 3bb raise size. When 3-betting from in position a 3.5x raise size is used. When 3-betting from out of position a 4x raise sizing is used. When in the big blind, facing a small blind limp, a 3.5x raise size is used. When 4-betting from out of position a 2.5x raise size is used. When 4-betting from in position a 2.3x raise size is used.
